

The Sandwich Shop

Breaking Through Bureaucracy in Amsterdam

Learning Objectives

- Understand the **dimensions of public value** at stake in social problem-solving.
- Understand the underlying causes of **government fragmentation, inertia**, and excessive **red tape**.
- Explore **analytic frameworks** and **leadership strategies** that can help overcome these obstacles and create public value for residents.

The Case of the Sandwich Shop

Click below to play clip
about the sandwich
shop situation in
Amsterdam.

Key Questions

1. Should the city **care** about the sandwich shop situation? Why?
2. If you think there was a **problem**, how would you define it?
3. Why do you think it was challenging for the city manager to get officials from different departments and other organizations to address the problem **collaboratively**?
4. If all involved organizations worked together and successfully addressed the problem(s), what **public value** would be created and for whom?
5. **What would you do** to address the situation going forward if you were City Manager Gerritsen?

Exploration

Was there a problem? If so, what was it?

If you were Gerritsen, what would you have done?

(Brookings Institution Press 2016)

The “*Anna Karenina* Principle”

All functional bureaucracies are alike.
Each dysfunctional bureaucracy is
dysfunctional in its own way.

Source: Adapted from Leo Tolstoy, *Anna Karenina*, trans. Richard Pevear and Larissa Volokhonsky (New York: Viking Penguin, 2001; original work published 1875-1877), 1.

A large iceberg floats in a blue ocean under a blue sky with white clouds. The visible tip of the iceberg is small and jagged, while the submerged portion is much larger and more complex in shape, illustrating the concept of hidden or underlying issues.

Red Tape

Culture

Structure

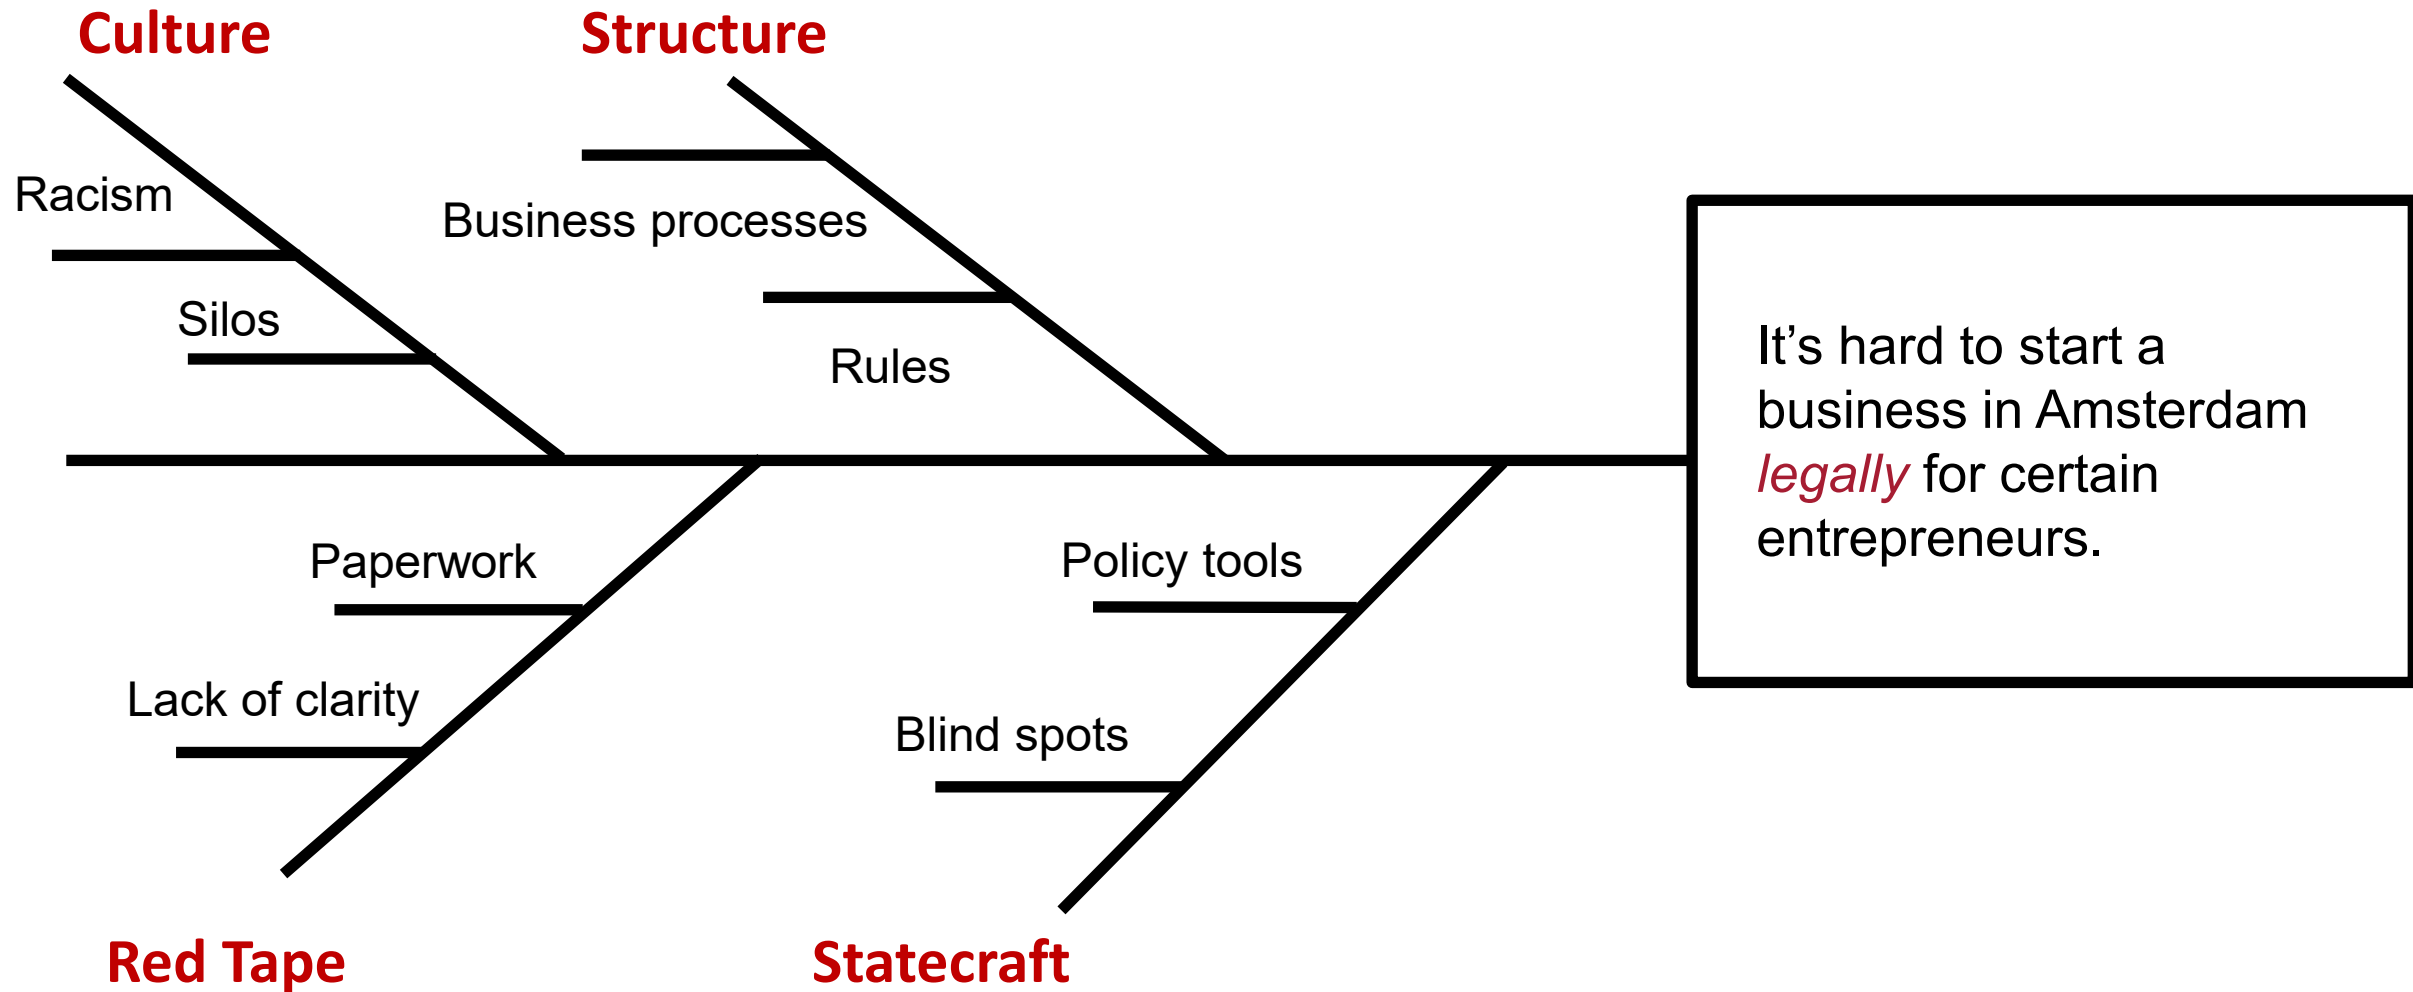

Statecraft

If the problem lies here...	Solutions might be found here...
“Red Tape”	User-centered design, mystery shopping, client focus groups, etc. E-government, single request for information, real one-stop shops, etc.
“Culture”	Strategic HRM, staff engagement, training, etc. Value-driven leadership, culture change, etc.
“Structure”	Business process redesign, regulatory reform, etc. Reshape performance management and accountability structures, etc.
“Statecraft”	Revisit policy goals and rethink choice of policy tools; New mix of (self-) regulation, tax structure, service delivery, choice architecture, etc.

Think About Your Key Priority...

... and ask yourself three
“very difficult, simple questions”:

Three “very difficult, simple questions”

1. What is the (real) problem?
2. What are you currently doing about it and why?
3. How do you know you are doing it well?

Epilogue

What happened in Amsterdam?

- Gerritsen monitored the case closely and took **measures to simplify licensing** for all entrepreneurs in the sector.
- **Akgün quickly obtained nearly all necessary documents.** Still, Gerritsen had to call an additional meeting so the housing corporation would **make an exception** and issue a lease contract, which the bank required to grant the loan.
- With depleted capital (and energy), Akgün **started selling sandwiches.**

What happened in Amsterdam? (cont.)

- Gerritsen learned Akgün's situation was indicative of a **larger problem**.
- A **new and improved “one-stop shop”** was opened—with staff trained to offer guidance on all forty permits/licenses and a single form to apply for seven licenses.
- Creating an online licensing portal offered an overview of the process, exposed contradictions, and led to **better training for civil servants**.
- **Results:** Lower costs of processing restaurant applications; citywide program to improve access to services by simplifying rules and regulations; “one-stop shop” method extended to four other sectors.

Takeaways

- **Diagnose problems before embracing solutions.**
 - Use the Strategic Triangle as a leadership compass or diagnostic/conversation tool.
- **Frame the challenge in terms of the public value you seek to create.**
 - *What is at stake? Have we defined the situation in a sufficiently compelling way?*
 - *Have we paid sufficient attention to what the different stakeholders care about?*
 - *What will it take to align value, capacity, and support? What leadership interventions might help with this process of alignment?*

Takeaways (cont.)

- Use the three “very difficult, simple questions” as a starting point:
 - *What is the **real** problem? What assumptions underlie the way the system currently works?*
 - *What are you currently doing about it, and why?*
 - *How do you know you’re doing it well?*
