**NEGOTIATION CASE SERIES**

0023SD

An aerial photograph of a city, likely in East Africa, showing a mix of residential and commercial buildings. A prominent road with a median runs through the center. The buildings have red-tiled roofs, and there are many green trees. The sky is blue with some clouds.

# CASE OVERVIEW

# CASE OVERVIEW

0023SD

- What was going on in this case?

# CONCEPT REVIEW: Interests

- An interest is “whatever you care about that is potentially at stake in the negotiation.” – Lax and Sebenius, *3-D Negotiation*
- “A position is likely to be concrete and explicit; the interests underlying it may well be unexpressed, intangible, and perhaps inconsistent.” – Fisher and Ury, *Getting to Yes*
- “It is difficult to immediately address interests in a negotiation because people adopt positional tendencies and because emotions can often conceal interests.” – Thompson, *The Mind and Heart of the Negotiator*

# CONCEPT REVIEW: BATNA

- **Best Alternative To Negotiated Agreement**
  - Of all the possible alternatives you could take without coming to an agreement in this specific negotiation, which one is the **best**?
- “The reason you negotiate is to produce something better than the results you can obtain without negotiating.” – Fisher and Ury, *Getting to Yes*
- “A BATNA is not something that a negotiator wishes for; rather, it is determined by objective reality.” – Thompson, *The Mind and Heart of the Negotiator*

# Working Groups: Parties and Interests

# CASE CONCEPTS

# Negotiation Scope and Sequence

In complex settings, **an effective negotiator manages things happening “away-from-the-table,”** including which issues are discussed, which stakeholders are engaged, and which negotiation moves happen in what order.

Lax and Sebenius call this “3-D negotiation,” which refers to the negotiation moves that setup the final deal.

In contrast, the first dimension includes interpersonal, at-the-table actions, and the second dimension includes designing value-creating deals.

	Focus	Definition
1-D	Tactics (people and processes)	
2-D	Deal design (value and substance)	
3-D	Setup (scope and sequence)	

# Barriers to an Agreement

An effective negotiator anticipates all possible barriers related to the negotiation setup, deal design, and tactics before developing a negotiating strategy.

- 3-D barriers: the wrong parties, interests, alternatives, process, or sequence of actions
- 2-D barriers: lack of feasible deal options
- 1-D barriers: poor communication

*Adapted from 3-D Negotiation (Lax and Sebenius)*

	Focus	Common Barriers	Approach
1-D	Tactics (people and processes)	Interpersonal issues, poor communication, “hardball” attitudes	Act “at the table” to improve interpersonal processes and tactics
2-D	Deal design (value and substance)	Lack of feasible or desirable agreements	Go “back to the drawing board” to design deals that unlock value that lasts
3-D	Setup (scope and sequence)	Parties, issues, BATNAs, and other elements don’t support a viable process or valuable agreement	Make moves “away from the table” to create a more favorable scope and sequence

*Adapted from Lax, D.A. and Sebenius, J.K., 2003. “3-D Negotiation: Playing the Whole Game.” Harvard Business Review.*

# Working Groups: Barriers

0023SD

# Working Groups: Barriers

What opportunities existed to address these barriers when Tumusiime joined KCCA?

# Actions Taken

What negotiation moves did Tumusiime make away-from-the table (third dimension)?

What moves did she make in the second and first dimensions?

# Working Groups: What's Next?

Was it the right time for Tumusiime to pursue a second loan from the World Bank?

If no, what should she have done next and for what reason?

0023SD

# TAKEAWAYS

# Takeaways

0023SD

- Thinking strategically about the phases of negotiation—specifically scope and sequence—can help practitioners prepare differently in order to obtain a better outcome.
- Negotiation is more than interpersonal tactics and at-the-table moments. Effective negotiators consider additional elements away-from-the-table that inform their strategy, strengthen alternatives, and improve deal options.
- A barriers audit and analysis will inform the strategy going into a negotiation, especially as related to the scope and sequence.
